Risk Management Information System (RMIS)
Managing COVID-19 Procedures

O HUB

The outbreak of COVID-19 has left organizations with a lot of questions and unknowns. Reductions to staff and the implementation of a remote workforce have changed how organizations are operating through this pandemic. Having HUB RMIS in place to help risk managers and safety professionals track and manage COVID-19 activity is critical in helping mitigate risk, and reduce the potential of financial fallout.

HUB RMIS Portal

- Report incidents or claims in real time
- Attach critical documents and pictures to any record
- Receive alerts or notifcations based on selected criteria
- Specify the type of data to be collected
- Mobile intake including GPS tracking

Geographical Information System (GIS)

- COVID-19 GIS map integration
- Multiple base maps (street, navagation, satellite)
- Multiple datasets integration
- Create specific data requirements

Disaster Recovery

- Ability to communicate with impacted locations immediately
- Maintain location and emergency contacts
- Send important business continuity planning documents for each location

Dashboards and Reports

- Create custom dashboards
- Create reports based on specific events
- Distribute reports electronically, and to specific groups
- Multiple graph, summary, detail, analysis templates available
- Export reports to multiple formats

We're HUB

We advise you on how to confidently identify, quantify and reduce risk through tailored solutions, so that you can protect what matters most: your people, your property, and your profitability.
